

COMPANY OVERVIEW & CAPABILITIES

Silveri Engineering & Trading Pty Ltd is an Australian-based engineering solutions company established in May 2018, dedicated to supporting industrial sectors both nationally and internationally. With a strong focus on the mining, oil & gas, manufacturing, quarrying and heavy-industry sectors, Silveri Engineering provides high-quality products, technical expertise and exceptional customer support to help keep complex machinery and operations running efficiently.

The company offers a comprehensive range of engineered equipment and systems, including:

- ◆ **Fuel and Oil Transfer Systems** – robust transfer and fast-fill solutions designed for diesel and fluid handling in mining, construction, rail and forestry applications.
- ◆ **Automatic Lubrication Systems** – centralized and automatic lubrication products that ensure reliable and consistent delivery of grease to multiple lubrication points, reducing maintenance time and extending equipment life.
- ◆ **Fire Suppression Systems** – advanced, patented fire protection solutions suitable for mobile equipment, industrial vehicles and facilities.
- ◆ **Workshop and Maintenance Equipment** – premium fluid measurement, fluid transfer and lubrication tools for workshop environments.
- ◆ **Desiccant Breathers and Filtration Solutions** – protective breathers and filters that prevent moisture and contaminants from entering critical oil, fuel and hydraulic systems, enhancing equipment reliability.
