

Fast Fill Systems now offers the next generation of high flow dry-break couplers. Constructed from steel, for sure latching and durability, the MX-Series comes in 7 different Nozzle-Receiver pairs that can only be connected to their matching colours, eliminating any possibility of cross-contamination. With a robust, grip-enhancing actuating ring and solid aluminium caps and plugs, these 1” dry-break connectors have been engineered for more than just high flow rates; they are engineered to last. These connectors have been engineered for more than just high flow rates – they are engineered to last! The MXSeries offers:

- Steel construction for sure latching and extended wear life
- Robust actuating ring that enhances grip and durability
- Elimination of any possible cross contamination
- Solid aluminium caps and plugs

Series of 7 nozzles will only inter-lock with colour-coordinated receiver.

TECHNICAL INFORMATION

Operating Pressure-All Couplers 500 psi

Burst Pressure -All Couplers 1500 psi

Operating Temperature -All couplers -35°F to 250°F

Flow Area -All Couplers Approx. .785 sq. in.
