

# perma CLASSIC

Simple, robust, reliable

## Activator -Discharge period in months

PART #	DESCRIPTION	1 MONTH	3 MONTHS	6 MONTHS	12 MONTHS
		Activator -1	Activator -3	Activator -6	Activator -12
SF01CLASSIC	CLASSIC 120CC PERMA MULTI-PURPOSE GREASE				
SF10CLASSIC	CLASSIC 120CC PERMA FOOD GRADE GREASE				

*perma NOVA Installation Kits available on request.*

The **perma Classic** is a simple, dependable single-point automatic lubricator designed to deliver consistent lubrication to bearings, chains, and mechanical components over a defined period.

Operating without the need for external power, the Perma Classic uses an electrochemical reaction to generate pressure, ensuring a continuous and controlled discharge of lubricant. This makes it ideal for remote or hazardous environments where manual lubrication is difficult or inconsistent.

With adjustable discharge periods and a transparent housing for easy visual monitoring, the Perma Classic helps reduce maintenance requirements, prevent premature wear, and improve equipment reliability.

### Key Benefits:

- Fully automatic, maintenance-free operation
- No external power required
- Adjustable lubrication periods
- Transparent housing for visual inspection
- Reduces downtime and extends equipment life

A proven solution across mining, manufacturing, and industrial applications, the Perma Classic delivers **reliable lubrication where it matters most.**
