

perma NOVA

For applications with high variations in temperature Intrinsicly safe

PART #	DESCRIPTION
SF01NOVA125LC	NOVA LUBRICATOR AUTOMATIC CARTRIDGE 125CC - MULTIPURPOSE GREASE
SF10NOVA125LC	NOVA LUBRICATOR AUTOMATIC CARTRIDGE 125CC - OIL APPLCATIONS

perma NOVA Installation Kits available on request.

Precision Lubrication. Engineered Reliability.

The **NOVA Automatic Lubricator – 125cc Cartridge** is a high-performance single-point lubrication system, designed to deliver continuous, controlled lubrication to critical machine components across demanding industrial environments.

Engineered with advanced electrochemical drive technology and temperature compensation, the NOVA system ensures consistent lubricant delivery, significantly reducing maintenance requirements and improving equipment reliability.

Product Overview

- The NOVA 125cc cartridge forms part of a modular lubrication system comprising:
- Reusable electronic control unit
- 125cc lubricant cartridge (LC)
- Protective housing assembly

This configuration allows for precise, adjustable lubrication output, tailored to suit application requirements.
